

EMERGENCY OXY RESCUE

MADE IN ITALY

EMERGENCY OXYRESCUE EMERGENCY CYLINDER 3-5-7L

Oxyrescue is an easy-to-use device for the administration of pure, compressed oxygen.

The integrated multifunctional valve is made of the best oxygen-compatible materials, and is the result of many years of research by Sanosub in this field. Its limited weight and dimensions make it perfect for all emergency centres, even on boats and dive centres.

Oxygen cylinder 3, 5 or 7 litres

Flow reducer for oxygen cylinders of all sizes with suction valve for continuous oxygen supply from 0-30 L/m and high concentration mask with collection tank and transparent silicone mask with demand valve for supply as required.

refill adapter supplied

other connections available on request

inlet 25E - 17E

outlet UNI - NF - DIN

Resuscitation Suitcase

2-litre oxygen cylinder (without charge), Balanced Piston Pressure Reducer with step adjustment for outflow. The hose holder can be rotated 360° facilitating the insertion of the nasal cannula and/or mask.

Article No. Description Price €

CO.400.18005 RESUSCITATION CASE COMPLETE WITH CYLINDER, AMBU, CANNULAE, MASKS 400,00

AMBU, cannulae, adult mask with venturi, paediatric oxygen mask, mouth opening lever, tongue clamp thermal blanket

IMPORTANT: Due to health regulations, the purchaser receives an empty gas cylinder. To refill it, you will have to call a company authorised to sell oxygen..
